Project Part 3

Due: May 1, 2024

I have provided the repository below which keeps track of all of the changes I've made to the project. I have sent email invitations to the TAs and the professor for access to the private repository.

Github Repository: <https://github.com/omerfarukbasar/RoomioApplication>

Within this repository, I have completed part 3 of the project. I have implemented the login/registration system, the searching and viewing of listings, pet management, posts/interests, and unit info display. In addition, I chose to implement the comment and favorites feature as my two additional features. The tables and sample data for those are attached in the repository and will also be distributed to the TAs via email prior to the demo. Lastly, I have made sure to put in place appropriate security measures such as prepared statements, and have also tested the login with 2 separate browsers.
